Hello my name is **Molly Francis**.

I'm a UI/UX product designer, researcher and leader based in Austin, Texas. I am focused on creating simple, clean, and smart user experiences while exploring the ever-changing interactive world. With over 20 years of experience across UI/UX design, user research, design systems, and design strategy, I integrate emerging AI tools to streamline workflows, uncover deeper insights, and enhance the design process.

“In my free time, I thrift and collect vintage art and eclectic objects. When it comes to having cats, the bigger and fluffier the better.”

EDUCATION

🎓 **Oklahoma State University**
Bachelor of Fine Arts in Graphic Design

EXPERIENCE

🔥 **NETSPEND** | *November 2025 - Current*

Lead Product Designer

- Lead UX for Netspend's Rewards program: consumer app and the internal UCM tool that powers it.
- Reworked the rewards layout and Information Architecture around new UCM capabilities.
- Run user testing to guide iteration.
- Use Claude, Gemini, and Figma Make to speed up design and prototyping.

🔷 **GOVOS** | *October 2023 - October 2025*

Lead Product Designer

- Drive UX strategy and design execution across core GovOS products, including eSubmission, Business Licensing & Tax, Cloud Search, and Cloud Records
- Conduct and synthesize user research to uncover insights, validate solutions, and guide product decisions
- Partner with cross-functional teams to align user needs with business goals and deliver end-to-end experiences that simplify complex government workflows
- Lead initiatives in accessibility, design systems, and scalable solutions to ensure long-term product growth and meaningful public impact

🌞 **BRIGHT HEALTH** | *March 2021 - April 2023*

Principal Product Designer

- Established a 0 to 1 provider portal for Prior Authorizations, reducing manual paperwork and enabling providers to electronically submit and track authorization status in real time
- Conducted user research and usability testing to validate workflows, uncover pain points, and ensure solutions met provider and patient needs
- Provided design leadership and mentorship, managing two designers and co-created a design system at a WCAG 2.2 AA accessibility standard that improved consistency and accelerated delivery across multiple products
- Designed a telehealth app (desktop + native mobile) that expanded patient access to care by supporting asynchronous/synchronous urgent visits and prescription refills

🏠 **CARE.COM (HOMEPAY)** | *April 2020 - February 2021*

Principal Product Designer

- Led the HomePay design team for a payroll, tax, and HR solution serving families with household employees (nannies, senior caregivers, etc.)
- Partnered with leadership to integrate UX into agile workflows, aligning design with product strategy and business goals
- Managed and scaled the UX team, mentoring designers and improving processes to elevate quality and collaboration
- Designed and enhanced internal Sales tools and client/employee-facing HomePay products, improving efficiency and user experience

🌻 **LIVEPERSON** | *July 2019 - February 2020*

Lead UX Designer

- Served as lead designer on a new social media management product, enabling brands to interact with consumers over social platforms through the LiveEngage messaging product
- Collaborated with the global UX team to update and scale the company’s design system, improving accessibility and consistency across AI/chatbot products

🌿 **ATHENAHEALTH** | *September 2016 - June 2019*

Principal Product Designer

- Conducted research and design for desktop and native mobile electronic health record (EHR) and patient portal products, improving usability and adoption for clinicians and patients
- Collaborated with a multi-disciplinary agile R&D team to define, design, and test features, streamlining workflows and enhancing the overall user experience
- Led user testing and validation, identifying pain points and driving design improvements that increased efficiency, reduced errors, and elevated patient satisfaction

🏥 **PATIENT IO** | *July 2016 - August 2016*

Lead Product Designer

- Served as Head of Product Design for desktop and native mobile apps supporting at-risk patients, designing for both patient-facing users and care managers
- Worked in a lean, iterative environment, streamlining designs and eliminating waste while accelerating delivery
- Collaborated with cross-functional teams to align design with product strategy and operational goals
- Maintained a customer-centric perspective, ensuring design decisions prioritized patient needs and improved care outcomes

🌈 **VOLUSION / MOZU** | *September 2014 - June 2016*

Senior UX Designer

- Designed interaction flows, visual design, and user experiences for the Volusion and Mozu e-commerce platforms
- Improved usability and engagement by refining UX flows and ensuring consistent visual design across the platforms

VOLUSION | *August 2011 - June 2013* / *Volusion*

Design Team Lead

- Managed a team of 5–9 designers in the Volusion Client Services group, providing mentorship and guidance to improve productivity, design quality and team performance
- Continued hands-on design and coding (HTML & CSS), delivering 10+ websites and branding projects per week
- Ensured the team produced user-friendly designs that met client goals and deadlines
