## Experience.

**Netspend**

November 2025 — Current

### Lead Product Designer

- Own design strategy and end-to-end UX for Netspend's Rewards program — the consumer-facing app and the internal Unified Commerce Management (UCM) tool that powers it.
- Reworked the rewards layout and Information Architecture around new UCM capabilities.
- Run qualitative and quantitative user testing to validate decisions and guide iteration.
- Use AI-assisted workflows (Claude, Gemini, Figma Make) to accelerate design exploration, prototyping, and iteration speed.

**GovOS (Neumo)**

October 2023 — October 2025

### Lead Product Designer

- Drive UX strategy and design execution across core GovOS products, including eSubmission, Business Licensing & Tax, Cloud Search, and Cloud Records.
- Conduct and synthesize user research to uncover insights, validate solutions, and guide product decisions.
- Partner with cross-functional teams and executive stakeholders to align user needs with business goals, driving go-to-market decisions for complex government workflows.
- Lead design systems governance, accessibility, and DesignOps initiatives to ensure long-term product growth and meaningful public impact.
- Piloted AI-assisted design and prototyping workflows (ChatGPT) to accelerate iteration and validate solutions faster across GovOS products.

**Bright Health**

March 2021 — April 2023

### Principal Product Designer

- Established a 0 to 1 provider portal for Prior Authorizations, reducing manual paperwork and enabling providers to electronically submit and track authorization status in real time.
- Conducted user research and usability testing to validate workflows, uncover pain points, and ensure solutions met provider and patient needs.
- Provided design leadership and mentorship, managing two designers and co-creating and governing a design system at a WCAG 2.2 AA accessibility standard that improved consistency and accelerated delivery across multiple products.
- Designed a telehealth app (desktop + native mobile) that expanded patient access to care by supporting asynchronous / synchronous urgent visits and prescription refills.

**Care.com (HomePay)**

April 2020 — February 2021

### **Principal Product Designer**

- Led the HomePay design team for a payroll, tax, and HR solution serving families with household employees (nannies, senior caregivers, etc.).
- Partnered with executive leadership to integrate UX into agile workflows, aligning design with product strategy and business goals.
- Managed and scaled the UX team — mentoring designers, facilitating critique, and building a stronger design culture to elevate quality and collaboration.
- Designed and enhanced internal Sales tools and client / employee-facing HomePay products, improving efficiency and user experience.

**Liveperson**

July 2019 — February 2020

### **Lead UX Designer**

- Served as lead designer on a new social media management product, enabling brands to interact with consumers over social platforms through the LiveEngage AI-powered messaging product.
- Collaborated with the global UX team to update and scale the company's design system for AI and chatbot products, improving accessibility and consistency company-wide.

**athenahealth**

September 2016 — June 2019

### **Principal Product Designer**

- Conducted research and design for desktop and native mobile electronic health record (EHR) and patient portal products, improving usability and adoption for clinicians and patients.
- Collaborated with a multi-disciplinary agile R&D team to define, design, and test features, streamlining workflows and enhancing the overall user experience.
- Led user testing and validation, identifying pain points and driving design improvements that increased efficiency, reduced errors, and elevated patient satisfaction.

**Patient IO**

July 2016 — August 2016

### **Lead Product Designer**

- Served as Head of Product Design for desktop and native mobile apps supporting at-risk patients, designing for both patient-facing users and care managers.
- Worked in a lean, iterative environment, streamlining designs and eliminating waste while accelerating delivery.
- Collaborated with cross-functional teams to align design with product strategy and operational goals.
- Maintained a customer-centric perspective, ensuring design decisions prioritized patient needs and improved care outcomes.

**Volusion / Mozu**

September 2014 — June 2016

### **Senior UX Designer**

- Designed interaction flows, visual design, and user experiences for the Volusion and Mozu e-commerce platforms.
- Improved usability and engagement by refining UX flows and ensuring consistent visual design across the platforms.
