## SUMMARY

I'm a UI/UX product designer, researcher and leader based in Austin, Texas. I am focused on creating simple, clean, and smart user experiences while exploring the ever-changing interactive world. With over 20 years of experience across UI/UX design, user research, design systems, and design strategy, I integrate emerging AI tools to streamline workflows, uncover deeper insights, and enhance the design process.

## EXPERIENCE

### Lead Product Designer · GovOS (Neumo)

October 2023 — October 2025

- Drive UX strategy and design execution across core GovOS products, including eSubmission, Business Licensing & Tax, Cloud Search, and Cloud Records.
- Conduct and synthesize user research to uncover insights, validate solutions, and guide product decisions.
- Partner with cross-functional teams to align user needs with business goals and deliver end-to-end experiences that simplify complex government workflows.
- Lead initiatives in accessibility, design systems, and scalable solutions to ensure long-term product growth and meaningful public impact.

### Principal Product Designer · Bright Health

March 2021 — April 2023

- Established a 0 to 1 provider portal for Prior Authorizations, reducing manual paperwork and enabling providers to electronically submit and track authorization status in real time.
- Conducted user research and usability testing to validate workflows, uncover pain points, and ensure solutions met provider and patient needs.
- Provided design leadership and mentorship, managing two designers and co-created a design system at a WCAG 2.2 AA accessibility standard that improved consistency and accelerated delivery across multiple products.
- Designed a telehealth app (desktop + native mobile) that expanded patient access to care by supporting asynchronous / synchronous urgent visits and prescription refills.

### Principal Product Designer · Care.com (HomePay)

April 2020 — February 2021

- Led the HomePay design team for a payroll, tax, and HR solution serving families with household employees (nannies, senior caregivers, etc.).
- Partnered with leadership to integrate UX into agile workflows, aligning design with product strategy and business goals.
- Managed and scaled the UX team, mentoring designers and improving processes to elevate quality and collaboration.
- Designed and enhanced internal Sales tools and client / employee-facing HomePay products, improving efficiency and user experience.

### Lead UX Designer · Liveperson

July 2019 — February 2020

- Served as lead designer on a new social media management product, enabling brands to interact with consumers over social platforms through the LiveEngage messaging product.
- Collaborated with the global UX team to update and scale the company's design system, improving accessibility and consistency across AI / chatbot products.

### Principal Product Designer · athenahealth

September 2016 — June 2019

- Conducted research and design for desktop and native mobile electronic health record (EHR) and patient portal products, improving usability and adoption for clinicians and patients.
- Collaborated with a multi-disciplinary agile R&D team to define, design, and test features, streamlining workflows and enhancing the overall user experience.
- Led user testing and validation, identifying pain points and driving design improvements that increased efficiency, reduced errors, and elevated patient satisfaction.

### Lead Product Designer · Patient IO

July 2016 — August 2016

- Served as Head of Product Design for desktop and native mobile apps supporting at-risk patients, designing for both patient-facing users and care managers.
- Worked in a lean, iterative environment, streamlining designs and eliminating waste while accelerating delivery.
- Collaborated with cross-functional teams to align design with product strategy and operational goals.
- Maintained a customer-centric perspective, ensuring design decisions prioritized patient needs and improved care outcomes.

## Senior UX Designer · Volusion / Mozu

September 2014 — June 2016

- Designed interaction flows, visual design, and user experiences for the Volusion and Mozu e-commerce platforms.
- Improved usability and engagement by refining UX flows and ensuring consistent visual design across the platforms.

## Design Team Lead · Volusion

August 2011 — June 2013

- Managed a team of 5–9 designers in the Volusion Client Services group, providing mentorship and guidance to improve productivity, design quality and team performance.
- Continued hands-on design and coding (HTML & CSS), delivering 10+ websites and branding projects per week.
- Ensured the team produced user-friendly designs that met client goals and deadlines.
